

2010 Summer Intern Program Corporate Center – Group Technology Infrastructure Services

UBS Overview

Headquartered in Zurich and Basel, Switzerland, UBS is a global firm providing services to private, corporate and institutional clients. Its strategy is to focus on international wealth management and the Swiss banking business alongside its global expertise in investment banking and asset management. In Switzerland, UBS is the market leader in retail and commercial banking.

UBS is present in all major financial centers worldwide. It has offices in over 50 countries, with about 38% of its employees working in the Americas, 34% in Switzerland, 15% in the rest of Europe and 13% in Asia Pacific. UBS employs more than 70,000 people around the world. Its shares are listed on the SIX Swiss Exchange, the New York Stock Exchange (NYSE) and the Tokyo Stock Exchange (TSE).

The Corporate Center ensures that all business divisions operate as a coherent and effective whole by providing and managing support and control functions for the business divisions and the Group in such areas as risk management and control, finance, legal and compliance, marketing and communications, funding, capital and balance sheet management, management of foreign currency earnings, human resources, information technology infrastructure and service centers.

Global Technology -- Group Technology Infrastructure Services

The Group Technology Infrastructure Services (GTIS) unit, part of Global Technology within Corporate Center, was conceived with the objective to pave the way for a common layer of technology across UBS. GTIS covers not just desktop PCs but almost all existing IT infrastructure functions across UBS including the management of data networks, telephone and other communications systems, IT security, distributed computing and servers, mainframes and data centers, market data services, user services and more.

Our work is always business critical, often innovative as well as challenging. Your technical support of the firm infrastructure and telecom systems maintain the business continuity that ultimately safeguards our client relationships. Day-to-day, you ensure that our service reflects global business requirements and maintains our technical delivery capability. We can offer you an exciting, fast-paced working environment, a culture of mutual respect and teamwork, and the opportunity to play a vital role in our growth.

Summer Intern Program

The Summer Internship Program lasts 10 weeks. In addition to the experience and education acquired on the job, interns have the opportunity to participate in a speaker series covering various areas of UBS technology, educational seminars, and various social and networking events.

Positions are available in Chicago, IL; Stamford, CT; New York, NY; Jersey City, NJ and Weehawken, NJ.

Qualifications

Basic: Candidates must graduate from a 4 year Bachelor's degree program between December 2010 and June 2011. Cumulative GPA of 3.0 or above

Preferred: Pursuing a Technology Focused Degree (e.g. Computer Science, Computer and/or Electrical Engineering, Business & Technology, Information Technology). Strong communications and interpersonal skills as exhibited through extracurricular activities, internships and academic projects

To Apply

Please forward your resume to Melissa.McKeon@ubs.com by March 19, 2010. If we recruit on your campus and you are required to apply through your Career Services Office, you must also submit an application to our website.

UBS is an equal opportunity employer committed to diversity in the workplace.
